Welcome from F BAR R Ranch

Just a few comments on our cattle and operation:

We are extremely proud of our **proven** low maintenance cow herd, a term used too loosely in the seedstock industry. For many years we have focused on using "spread" bulls. Those being cattle with lower birth weights yet still achieving good weaning and yearling gain performance. If we don't start with an unassisted live calf, the other traits don't matter much.

Calving in winter is not of interest to us. Both labor and feed are expensive and hard to come by. Too many cow herd grazing days are lost to winter calving.

Calving ease, foot quality, and strong maternal traits have always been our main requirements when selecting our bulls. Other than our first calvers who are kept handy during calving, the rest all calve in large fields in May and June, and are seen once daily to record and process new borns. Our death loss under this lack of management is usually 3%.

Our bulls are presented with a lot less feed than most sale bulls. Bulls can find a lot of ways to wreck themselves and we don't figure we should help that out with overfeeding. These bulls were weaned in late November/December and were wintered on free choice mixed hay and drought destroyed greenfeed. We are not looking for much gain since they all go back to grass in May. We have included a grass weight taken in early January being supplemented with hay for the last 30 days. Since then, they have been on a mixed ration of triticale silage, 6 pounds of pellets, chopped lentil straw, and free choice kochia-lentil greenfeed. The bulls here represent the top 30% from the 2021 calf crop.

- No feet trimmed, and no hair clipped
- Given both fusogard shots for foot rot prevention
- On a complete bova shield program

Calving Ease Scores (these can vary a bit as it is simply our projection based on the information we have)

3-High level calving ease. Should work well on Angus based heifers and all aged cows.

2- Should calve easily but should maybe be used on heifers that have some supervision. Again will work well on all aged cows

1-A bit more birth weight or history of it. These bulls are best used on cows and expect no issues

*We have noticed some avoid high calving ease bulls for use on mature cows. Most of our young bulls are used on heifers and or second calvers before going on cows. For the most part, their calves will fit right in, perform well and may help keep mature cow size down.

Feel free to call, text, email or stop by anytime.

Cell:403.325.0112 Home:403.787.2341 Email: mgfraser@telusplanet.net

We appreciate your time and interest.
Murray Fraser

F-R Angus Reference Sires

BURNETT EDISON 16E

A Motive X 46P cow purchased from Wyatt and Bryce Burnett at Swift Current. 16E ran with heifers for two years and now with cows. He has stunning daughters and absolutely no calving issues and very sound.

LANGCO BROKEN BOW 647D

Bought sight unseen from Steven Lang and family from Viking. Steven said his sire was the best footed Angus bull he had ever owned and his Dam is fantastic uddered. He is now a rising 5 year old. His feet are perfect, he has a stride you wish more bulls had, and is docile and easy to handle

66 ATTRACTION 495C

Good sound bull from an elite daughter of Badlands Daquante 26L. Very consistent breeding bull. First daughters are the kind we all like. Another one that can cover the country.

OLEF 659B

DDA PINEBANK 50H son purchased from Ole Farms. Calving ease, sound structure, and mild temperament on a very moderate frame. Sons are good and the daughters are better. Another one who spent the first two years with heifers and then on to cows. Has bred here multi sired for 7 years and is now retired.

F-R CT LAD 1184Y

Homegrown Thunder son that does the important things as good as any.

Sound footed, quiet, nice daughters, and super calving ease along with enough performance. We lost this bull late last summer as a 9 yr old spending every year in a multi sire group. His mother was the money making kind of cow. Incredibly sound structure, nice udder and lasted here until she was 16 with no special care.

F-R CEDAR RIDGE 3255

Another 9-year-old still working here. Top selling bull from our 2015 sale to Classic Livestock. We were able to buy back walking rights. This bull is very moderate with great feet and fleshes easy. Now that his daughters are coming into production, we are going to use him heavier. They are good!

His Dam was the best uddered cow we owned at the time. Looks like his daughters will be the same. Another benefit is to date all but one son has tested TT Leptin. Used last year at 9 and retired.

F-R 0250 3349

Another home-grown sire who does the things right. Has quietly went about his business in multi sire groups for seven breeding seasons and is still here.

Daughters have a lot of sons in the sale. Used last year at 9 and retired.

CLLC MOMENTAL 411B

Purchased from the Clark family. Super sound momental 0505x 9160 cow. Does moderate mature size. Work anywhere kind of cattle

F-R 1060 7220E

Out of one of the better old cows here and sired by a bull that left really nice females. Dam is 12 and has survived 2 'age' culls for the last 2 years.

OLE PINEBANK 407F

Moderate frame, very thick

F-R 2221 9249

Moderate, thick with a very good dam

F-R 6350 9045

Used on heifers. Owned by Jay Jans

CLLC THUNDER 898F

Sound, mild disposition, very good dam

BURNETT SPADE 118G

Moderate, easy fleshing, exceptionally good feet

XO CROWFOOT ROCKY 557C

Bit more frame, good performance, purchased because of dam

GARNIER WEIGH UP 920G

Purchased as CE option, quality dam

GARNIER BIG SKY 910G

Extremely good footed and disposition, quality dam

66 HOOVER DAM 71G

Moderate, thick, strong footed, mild disposition, quality dam

F-R BLACK ANGUS

Two Year old Bulls
